

CONCEPTS & DEFINITIONS

Premises:

Premises has been defined as a building along with the land and /or common places attached to it. Premises may not always have a compound wall or fencing. In such cases, the land or the common place as the case may be, available to the household is treated as 'premises'.

Building:

A 'building' is generally a single structure on the ground. Usually a building will have four walls and a roof. However, in some areas, the very nature of construction of building is such that there are no walls as in the case of conical structures. Such conical structures are also treated as buildings. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings (residences) or establishments such as shops business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns etc. It is also possible that buildings which have component units are used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, residence-cum-doctor's clinic etc.

Census house:

A 'Census house' is a building or part of a building used or recognized as a separate unit because it has a separate main entrance from the road or common courtyard or staircase etc. These may be occupied or vacant and may be used for residential or non-residential purposes or both. The following codes were used to record the various uses of Census Houses for Census 2011.

Residence	1
Residence-cum-other use	2
Shop/office	3
School/college etc	4
Hotel/lodge/guest house etc	5
Hospital/dispensary etc	6
Factory/workshop/work shed etc	7
Place of worship	8
Other non-residential use	9
Vacant	0

Household:

A 'household' in Census is defined as a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevents any of them from doing so. The persons in a household may be related or unrelated or a mix of both. However, if a group of un-related persons live in a Census house but do not take their meals from the common kitchen, they are not considered a part of common household. Each such person is treated as a separate household.

Main source of Drinking Water:

Data was collected regarding the main source of drinking water for the household. The source, which was availed during the greater part of the year was to be recorded as the main source. Tap water was bifurcated into two categories i.e. 'Tap water from treated source' and 'Tap water from un-treated source'. Similarly well water was separately canvassed under 'Covered well' and 'Un-covered well'. Hand pump code was used where ground water was extracted manually. Tube well/Borehole code was used where sub-soil water was taken out through electricity or diesel pump. Other sources included those cases where drinking water was made available by tankers or bottled water was used by the household. The following codes were used.

Main source of Drinking water	Code
Tap water from Treated source	1
Tap water from Un-treated source	2
Covered well	3
Un-covered well	4
Hand pump	5
Tube well/borehole	6
Spring	7
River/canal	8
Tank/pond/lake	9
Other sources	0

Availability of drinking water source: Information on availability of drinking water source was collected depending upon the distance at which it was available.

- i) **Within the premises:** Code '1' was assigned if the source was located within the premises where the household lived.
- ii) **Near the premises:** Code '2' was assigned if the source was located within a range of 100 metres from the premises in urban areas and within a distance of 500 metres in the case of rural areas.
- iii) **Away from the premises:** Code '3' was recorded if the drinking water source was located beyond 100 metres from the premises in urban areas and 500 metres in rural areas.

Main source of Lighting:

As in Census 2001, the data for main source of lighting used by the household was also collected in Census 2011. The Enumerator was instructed to ascertain the main source of lighting used by the household for major part of the last 12 months and record the appropriate code. Six sources and their codes used for collection of information on main source of lighting in Census 2011 are as follows.

Main source of lighting	Code
Electricity	1
Kerosene	2
Solar	3
Other oil	4
Any other	5
No lighting	6

Availability and Type of Latrine within the Premises:

Two questions were canvassed during Houselisting & Housing Census, 2011 to ascertain the availability and type of latrine within the premises. The first question related to whether latrine facility was available within the premises. Based on the response to this question, the appropriate codes for the type of latrine was recorded. The set of codes used during Census 2011 are given below:

Type of latrine facility	Code
Flush/pour flush latrine connected to	
Piped sewer system	1
Septic tank	2
Other system	3
Pit latrine	
With slab/Ventilated improved pit	4
Without slab/open pit	5

Type of latrine facility	Code
Night soil disposed into open drain	6
Service latrine	
Night soil removed by human	7
Night soil serviced by animals	8
No latrine within premises	
Public latrine	9
Open	0

If the pour flush latrine was connected to a system of sewer pipes that collected both human excreta and waste water and removed them from the household environment, code '1' was recorded. Sewerage system consisted of facilities for collection, pumping, treating and disposing of human excreta and waste water. This system is usually underground and is maintained by public authorities. If the pour flush latrine was connected to a septic tank that collected both human excreta and waste water and removed from the household environment code '2' was recorded. Septic tank refers to a system for excreta collection consisting of a water-tight settling tank normally located underground, away from the house. These septic tanks undergo cleaning periodically (usually after a few years) either manually or by machines. If the flush/pour flush latrine was connected to any system other than piped sewer system or septic tank, e.g., excreta flushed to the street yard/plot, drainage ditch or other location, it was given code '3'.

Defecation into pits dug into the ground for the reception of night soil directly without flushing was reckoned as pit latrines. A pit latrine with a squatting slab or platform or seat firmly supported on all sides which was raised above the surrounding ground level to prevent surface water from entering the pit and easy to clean was recorded as 'Pit latrine with slab'. Such pit latrines were sometimes ventilated by a pipe extending above the latrine roof and the open end of the vent pipe was covered with mesh or fly-proof net. This was referred to as ventilated improved pit latrine. Code '4' was recorded for both these types of latrines. A pit latrine without a squatting slab or platform or seat was given code '5'.

In some parts of the Country there is facility of a latrine within the premises but the waste material is disposed directly into the open drain. Code '6' was recorded for these type of latrines.

In many parts of the Country the human excreta is collected in a bucket or other container or even allowed to collect in the open and is removed physically by human beings or animals. In case it was removed by human beings, code '7' was recorded and in case it was serviced by animal, code '8' was recorded.

Data was collected separately for the households using public latrine (Code '9') and defecating in the open areas such as open fields, bush, river, stream, railway tracks etc. (Code '0').

Mode of Transportation

The availability of modes of transport – Bicycle, Scooter/Motor Cycle/Moped and Car/Jeep/Van was ascertained. The enquiry was limited to their availability and not their number, source or ownership.

Bicycle: Yes-1/No-2

If the household had a bicycle code '1' was recorded. If not, code '2' was recorded. Tricycle used by the disabled persons was also considered as bicycle and code '1' was given if the household was in possession.

Scooter/Motor Cycle/Moped: Yes-1/No-2

The availability of scooter or motor cycle or moped was ascertained from the respondent. If the household had a scooter or a motor cycle or a moped code '1' was recorded. If not, code '2' was recorded. This asset was treated as available if the household had any type of two wheeled motorized vehicle having 50 CC or above.

Car/Jeep/Van: Yes-1/No-2

A car or jeep or van was treated as available to the household, if this was put to use by the member(s) of the household for her/his/their own use. Code '1' was recorded if it was available and code '2' was recorded if it was not available. This asset was also treated as available to the household, if any member(s) of the household possessed a multi utility vehicle (MUV) or sports utility vehicle (SUV) or sports car.

Mode of Communication

Radio/Transistor: Yes-1/No-2

If the household had a radio or a transistor or both code '1' was recorded and if none of these were available with the household code '2' was recorded.

Television: Yes-1/No-2

If the household had a television set, colour or black & white, code '1' was recorded else code '2' was recorded.

Computer/Laptop: Yes: With internet-1, Without internet-2/No-3

This is new question introduced in Census 2011. If the household had a computer, desktop or laptop with internet, for use by one or more members in household, code '1' was entered. If the household had a computer, desktop or laptop without internet, for use by one or more members in the household, code '2' was entered. In case computer, desk top or laptop was not available in the household code '3' was entered. Computer includes the monitor with colour or black and white screen.

Telephone/Mobile phone: Yes: Landline only-1 Mobile only-2, Both-3/No-4

In Census 2001 information on availability of Telephone was collected and in 2011 the scope of this question was expanded to include information on mobile phone also. If the household had a Landline Telephone only, code '1' was recorded. If the household had Mobile Phone only, code '2' was recorded. If the household had both the Landline Telephone as well as the Mobile Phone, code '3' was entered. If the household had neither Landline Telephone nor Mobile Phone, then code '4' was recorded. Landline Telephone includes wireless landline telephones.

- Note:-**
- i) Data for indicators is presented in percentages.
 - ii) The sum of percentages may not add up to total due to rounding off.
